

EmpowerTM

Data Management Solution

A one-click solution

ES&S' Empower securely hosts, stores and manages data for millions of records, saving customers time, money and staff needed for web hosting management.

87% of ES&S' voter registration customers host on Empower

Take control. Partner with ES&S.

While some companies offer "cloud self-service" models that place the full burden of data management, security and compliance on their customers — leaving them to navigate the complexities of election data on their own — our team brings over 35 years of hosting experience to support you every step of the way. ES&S is committed to ensuring a seamless election process and providing comprehensive support for data storage and management. Key features include:

- Dedicated environment for election data
- No data on a public cloud
- No outsourcing to a non-election platform
- No on-premise data management

Is Empower a cloud solution?

No. ES&S' Empower solution offers the convenience and cost-effectiveness of a cloud solution, without compromising on the security of your data.

Why host with ES&S?

We don't just host your data; we understand it. For more than 40 years, ES&S has worked exclusively in the election industry. We care about what you do.

KEY FEATURES & BENEFITS

Protection

Empower allows you to monitor and control access, protect sensitive data and maintain regulatory compliance. To shield against internal and external threats, the application has multiple security levels, including:

- SSAE 16 Certified and PCI-compliant facilities
- Physical firewalls
- Virtual firewalls
- Antivirus software and antimalware
- Intrusion detection, intrusion prevention, and data integrity checking
- Physical and virtual partitioning of data

Time savings

Free up your IT department to manage the services that your different applications provide, and drive greater business value with realigned resources.

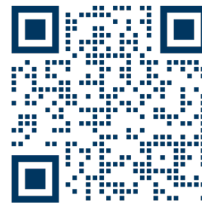

- Fully managed with hardware and software maintained by ES&S in our environment
- Monitor network stability
- Licensing
- Ease of use as ES&S:
 - Tests and installs patches
 - Manages upgrades
 - Monitors performance
 - Ensures high availability

Stability

ES&S developed Empower for jurisdictions that cannot sacrifice the time, staff or money required to maintain the complexities of election data on their own. With Empower you get:

- Predictable budget
- Minimal commitment of resources
- Reduce variable costs
- No up-front investment
