ExpressVote®
Universal Voting System

Built on a foundation of proven reliability, the new ExpressVote Universal Voting System offers improved security, performance and accessibility.

Featuring a brighter, more responsive touch screen, it delivers an intuitive user experience with smooth, precise interactions. It also features a redesigned high-speed paper path and faster startup. This system builds on a decade of proven Election Day success. The new ExpressVote is designed for the future, featuring flexible on-screen ballot layout capabilities and an assist mode to ensure a seamless and reliable voting experience for everyone.

Easy-to-read ballots

Visual aids include high contrast and zoom functionality.

Multilingual

Any language is supported in audio, and 30+ languages are supported in text.
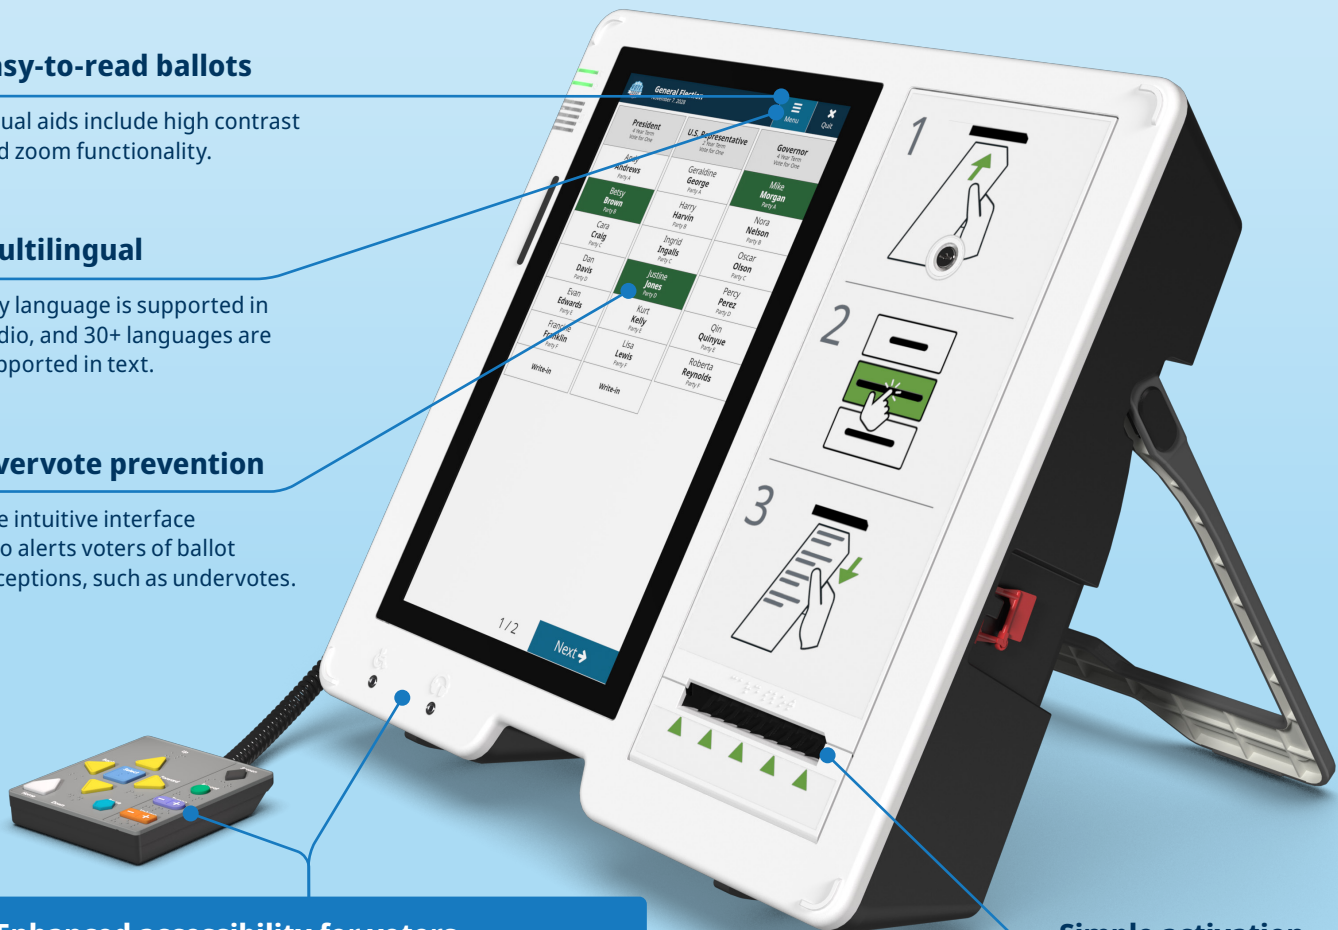

Overvote prevention

The intuitive interface also alerts voters of ballot exceptions, such as undervotes.

Enhanced accessibility for voters

Voters can independently enable assistive mode by pressing any keypad button or using their preferred two-position switch device, activating features such as audio and navigation. The front access panel ports facilitate quick connections for headphones and other accessibility devices.

Simple activation

Voters insert a card to activate the voting session. After voting is complete, the ballot is dispensed for voter review.

A versatile solution: Vote centers • Early voting • Polling places • Election Day

Easy election management

- Reduces costs by eliminating the need for printing and storing traditional preprinted paper ballots.

- Simplifies post-election management because there are no unclear marks to adjudicate. Voters are prompted in real time to address over and undervotes.

- Produces a voter-verifiable paper record that is scanned, tabulated and saved for auditing purposes.

- Prevents poll workers from giving voters the wrong ballot style since they don't need to pick and pull ballots.

- Maximizes your investment because it can be used many ways — in polling places and vote centers during early voting and on Election Day.

A great experience for voters

- Fully compliant with the Americans with Disabilities Act (ADA), enables all eligible voters to make their selections privately and independently.

- Improves voter confidence because the interface prevents voters from overvoting and alerts them to ballot exceptions, such as undervotes.

- Provides voters the opportunity to review their selections twice before tabulation — on the summary screen and on the printed paper ballot.

- Offers assistive mode so that voters can have their selections read back before printing their ballot.

Poll workers love it

- Shorter Election Day for poll workers — six steps to open and two to close — so they don't need to arrive as early or stay as late.

- Small, lightweight and easy to move and store.

- No ink to replace on Election Day.

Security you can count on®

The ExpressVote offers so many security features, we couldn't include them all here. To learn about the extensive measures we take to safeguard our systems and data, visit **essvote.com/feature/security**.

Integrated for easier election management

Together with the ExpressPoll® electronic pollbook and ExpressVote® Printer, you can quickly check in voters and serve up to 15,000 different ballot styles. This means no more picking and pulling ballots or wasted preprinted stock — voters get in and out faster.
