ExpressVote® Printer

Activation Card Printer

Check-in Integration

Compatible with ExpressPoll, ExpressLink software, and other pollbooks to print the voter's correct ballot style.

Compact and Portable

Only 5 pounds. Designed for easy transport and storage.

Customizable

Header area can accommodate specific state requirements.

Thermal Printing

Uses heat to print so there is no need for ink cartridges or toner.

Fast Printing

Prints activation cards from 11 inches to 19 inches in 5 seconds or less.

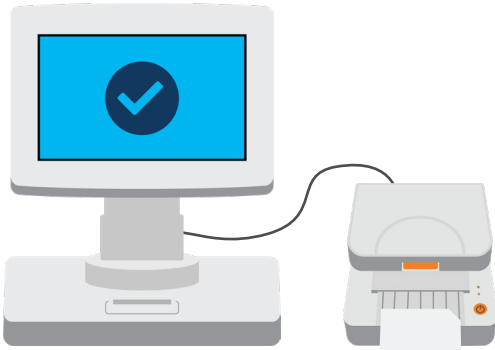

COST- AND TIME-SAVING BENEFITS

- Simplifies the set-up and shut-down process for poll workers.

- Dismisses the need for special transportation or need for large storage space due to its compact size.

- Reduces wait time as it is ready to print 5 seconds after turning it on. Prints up to a 19-inch activation card in just 5 seconds.

- Eliminates ballot waste as it prints on demand.

- Eliminates the need for toner as there is no need to change out ink or drums during the day.

- Accelerates the voter check-in process with a secure, hardwired connection to the ExpressPoll electronic pollbook.

- Improves the voter experience as voters will receive the activation card that correctly identifies the correct ballot information.

A SEAMLESS EXPERIENCE FOR VOTERS AND POLL WORKERS ALIKE

The ExpressVote Printer works with the ExpressPoll® electronic pollbook and the Universal Voting System product family, including the ExpressVote® and ExpressVote® XL, to provide an end-to-end early voting and Election Day solution.

1 The poll worker uses ExpressPoll or another pollbook solution to identify the voter's correct ballot style.
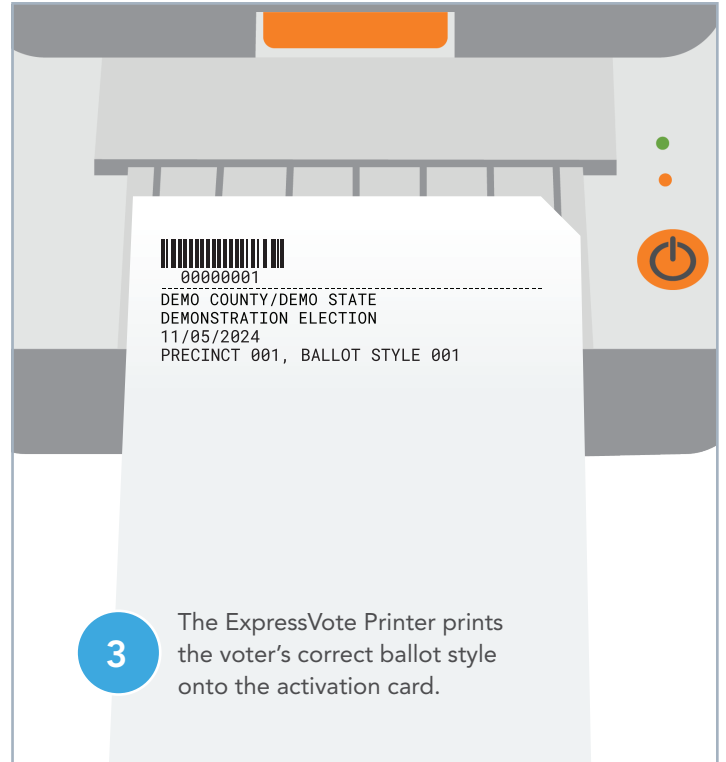

2 The poll worker inserts a blank activation card into the ExpressVote printer.

```
00000001
DEMO COUNTY/DEMO STATE
DEMONSTRATION ELECTION
11/05/2024
PRECINCT 001, BALLOT STYLE 001
```
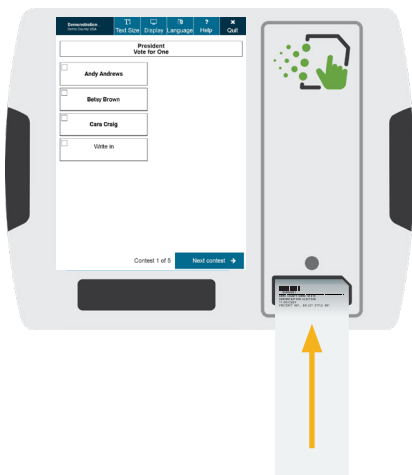

3 The ExpressVote Printer prints the voter's correct ballot style onto the activation card.

4 The voter inserts the activation card into an ExpressVote or ExpressVote XL, the ballot style is read, and the correct ballot is automatically displayed on screen.
